Table of Contents

1. Basic of Android

- What is Android
- History and Version
- Installing software's
- Android Studio
- Hello Android example
- Internal Details
- Core Building Blocks for Android
- Creating a Project for Android
- The Anatomy of an Android App

2. Activity, Intent & Fragment

- Activity Lifecycle
- Activity Example
- Implicit Intent
- Explicit Intent
- Fragment Lifecycle
- Fragment Example
- Destabilization in Motion
- Using Intents to Connect Activities
- Displaying Notifications
- Using Intents to Call Built-In Applications

3. Android User Interface

- Responding to the Configuration of the Display
- Managing Changes to Screen Orientation
- Utilizing the Action Bar
- Creating the User Interface Programmatically
- Listening for UI Notifications
- Programmatically creating the user interface

4. UI Widget

- Button, Image Button, and Toggle Button are some of the buttons that may be used.

- Toast and Custom Toast
- CheckBox
- AlertDialog
- Spinner
- AutoCompleteTextView
-
- RatingBar
- DatePicker & TimePicker
- ProgressBarAnalog Clock and Digital Clock
- File Download

5. Layout Manager

- Constraint Layout
- Relative Layout
- Linear Layout
- Table Layout
- Grid Layout
- Frame Layout

6. Style and Themes

- styles.xml
- Shapes, gradients, and fully editable objects (selectors)
- style attribute in layout file
- Using JavaScript and a manifest file to apply themes

7. Advanced UI

- Custom Adapters(Array,ArrayList,Base), Adapters(Array,ArrayList,Base)
- principles of classification (GridView, ListView, Spinner,RecyclerView)
-
- WebView,ScrollView,SearchView,TabHost and DynamicListView
- Menus(Option Menu,Context Menu,Popup Menu)
- Customizing and combining Views

8. Data storage

- Priorities that are shared
- Internal Storage (Files)
- External Storage(SD Card)
- SQLite Databases
- Opening and closing a database
- sqLiteOpenHelper and database creation.
- Working with cursors Inserts, updates, and deletes

9. Content Provider

- Fundamentals of a Content Provider
- Simply notify the File Sharer.
- Other Built-in Content Providers
- Creating Custom Content Provider

- Understanding Content URI
- ContentResolver
- Content from a custom content provider is shared

10. Multimedia

- Multimedia API
- Playing Audio
- Creating Audio Player
- Playing Video
- Alarm Manager

11. Speech API

- API for TextToSpeech
- Exercising TextToSpeech
- SpeechToText Example
- organization slant and acceleration
- Speech To Text

12. Telephony API

- Telephony Manager
- Get Call State
- Call State BroadcastReceiver
- Simple Caller Talker
- Making Phone Call
- Send SMS
- Send Email

13. Location Based Services and Google Maps

- Taking Advantage of Location-Based Service
- Locating your present position and listening for changes
- Proximity alerts
- Working with Google Maps
- Incorporating a Google Map into an Activity
- Map Overlays
- Using the Geocoder
- Developing Activities Based on Map

14. WiFi & Bluetooth

- Using a nearby Bluetooth device to control it
- Pairing and detecting Bluetooth devices
- Bluetooth connection management
- Bluetooth for sharing information

- Controlling and monitoring Internet access
- Keeping track of active connections
- Taking care of WiFi networks

15. Sensor

- Sensor API
- Sensors for motion and placement
- Environmental Sensor
- SensorManager class
- Sensor Class
- SensorEvent class
- SensorEventListener is an interface for listening to sensor events.
- Sensors for compass, accelerometer, and orientation

16. Android Service

- Starting Your Own Business
- Creating a channel of communication between a service and a task
- Creating a link between activities and services
- Getting to Know Threading
- Background services and alerts to automate activities in the background
- SyncAdapters provide efficient background data transfers.

17. Android Networking

- Use of the Internet
- Making use of web services
- Using XML/JSON as a data format
- JSON Services Consumption

18. Firebase - Realtime Database, Cloud Messaging & Cloud Storage

- Integrate Firebase into your Android app
- Linking Databases
- Retrieving and saving real-time data
- Authentication for Firebase Login and Registration
- Using Firebase Cloud Messaging to send push alerts
- CRUD Operations in Firebase Realtime Database
- Image Uploading to Firebase Storage

19. Publishing Android Applications

- The Methodology for Preparing a Publication
- How to Make an Encryption key File
- Creating a Secret Key
- Creating the APK File for the Application
- Create an account on the Google Play Developer Console.
